

Inside Out

Jay Ferguson

I never went to bed until they turned out the sun
Another shot of coffee and I'm back on the run
There's trouble in the papers and the world's on strike
Well, it's just another day living just another life
Inside out

The people on the screen, they keep giving me advice
They're talking 'bout the kids who tried everything twice
It's getting hot with all this acid in the air
But I get my bonus soon so I really shouldn't care
Inside out

Inside out

Oh, now we all speak in German and we're working for Japan
I'm a twenty-first century Renaissance man
Psychogenics, cybernetics, systematic strife
It's just another day living just another life
Inside out
Inside out
Inside out
Inside out
Inside out
