

White Noise

Jay Ferguson

Rude boy waiting on the corner
Got nowhere to go
Wrapped up tight in the rhythm of the night
It sounds like rock and roll

It sounds like
White noise
White noise
Everybody's going down
White noise
White noise
You can feel it all around

Meet me down in the bottom
I'll take you to the top
When you're caught in the middle
There ain't no way to stop

Can't stop that
White noise
White noise
It don't matter what they say
White noise
White noise
Nobody gets away from that

White noise
White noise
Now it's everywhere you go
White noise
White noise
And you can't say no

Got your back to the corner
Your head against the wall
Don't push your face through the glass
Just get your guitar

And make some
White noise
White noise
When you start to feel the heat
White noise
Oh, make some white noise
You gotta take it to the street

White noise
Yeah, yeah, yeah, yeah
White noise
Doesn't matter what they say
White noise
Oh yeah, oh yeah, oh yeah
White noise
Nobody gets away from that
White noise

Look out, it's some

White noise
White noise
White noise
White noise
