

Breaking Glass

Jay-Jay Johanson

I've been trying to heal your wounds Hope it's gonna be better soon
What more can I do Oh, I wish I knew

There's a chance that I wanna take And a fragile heart to unbreak
But I don't know how Can you help me now

To the sound of breaking glass We will reach our goal at last This is now
Let's forget the past

To the sound of breaking glass Everything we'll do will last This is now
Let's forget the past

Yes I know, I was there today Maybe I will go there again Nothing happened once
Things I should have done

Someone's standing there in the hall But then suddenly not at all
Stood so close to me But I couldn't see

To the sound of breaking glass We will reach our goal at last This is now
Let's forget the past

To the sound of breaking glass Everything we'll do will last This is now
Let's forget the past
