We take it high, never low
On the grind, on the go
Uh, even if things don't go your way, mmhm, keep following your heart, uh
Only god knows how far we'll go, yea
I'm only human, sometimes I doubt, yea
But I set my head straight then yeah I hustle day and night
Even if I have to reset sometimes, I never look back
My future is bright, they need glasses
It's already decided that I will succeed
I rode the rhythm and my life is full
My plan is to be happy
So many good days to come yea, yea
Though I want to cry sometimes, I live with a smile yea, yea
So many good days to come yea, yea
Let's get it boy get it get it get it, oh

Flip it upside down
Push behind negative thoughts
Always believe in yourself
Keep challenging yourself before it's over
Yeah, we on fire

You're still being so cautious
No one will know before you take a step forward
Why do you still think that it's a miracle?
Each moment is an opportunity, flip that negativity upside down right away
Even if you fall six times, 777
Even if I can't eat, I go go go go
So when your sweat that wells up in the sky falls as rain, you can smile
So when you're drunk and you're slurring, you can stand on your two feet

Turn the negativity upside down, raise it up nicely
You can change things, you've seen it endlessly
Use the word "anyway" next time
Things will change however you think them out to be
Results will follow exactly
Yea let's get it

Flip it upside down
Push behind negative thoughts
Always believe in yourself
Keep challenging yourself before it's over
Yeah, we on fire

If you feel the same for me, the way I feel for you
Hundreds of times a day, I think of the reasons for failure
Worries stacking on top of the endless thoughts like a millefeuille
Now eat it, though I'm afraid of your critique
Be patient, feels like everyone's partying except for me
Instead, opportunities that believe in me are next to me
If the grass always looks greener on the other side, all your life, you'll be
finger lickin' lickin'
We only realize too late that we're getting time stolen over useless things,
things, things (things, things, things)
Wrongly thinking that everyone is looking at your life
Even if you just shed that thought, the pressure will go down a lot
No need to rush, everything is up to god's plan
I got this cut difficultly, next scene is a group hoist

Ay ay
Ay ay ay ay ayye, ayye
Ay ay
Ay ay ay ay ayye, ayye

Flip it upside down
Push behind negative thoughts
Always believe in yourself
Keep challenging yourself before it's over
Yeah, we on fire
