

Guiding Star

Jay R

Through all the hours and days
No better time then today
'Cause your here by my side
When work puts me on that plane
And makes the distance between us
I write your name in the sky

You warm up the cold
Turn a house to a home
There's no place that I'd rather be

I can bear all the storms
'Cause your light keeps me warm
No, I'm never alone
I can hear your voice
All it takes is a smile
To make it all worth while
When I'm lost and I've gone too far
You're my guiding star

Got dark a few times before
Drove down some broken roads
But we made in one piece
Old scars turn to memories
You were so patient with me
No, it doesn't get no better

You can warm all the cold
Turn a house to a home
There's no place that I'd rather be

I can bear all the storms
'Cause your light keeps me warm
No, I'm never alone
I can hear your voice
All it takes is a smile
To make it all worth while
When I'm lost and I've gone too far
You're my guiding

Stars are made to light the way
Made up of two hearts that never will stray
Even in the darkest moments
I'll know now which way to go
'Cause you'll always light up my soul

I can bear all the storms
'Cause your light keeps me warm
No, I'm never alone
I can hear your voice
All it takes is a smile
To make it all worth while
When I'm lost and I've gone too far
You're my guiding star

I can bear all the storms
'Cause your light keeps me warm

No, I'm never alone
I can hear your voice
All it takes is a smile
To make it all worth while
When I'm lost and I've gone too far
You're my guiding star
