

Can't Figure U Out

Jay Wheeler

Dying inside, I can tell you love it
When you on a high, I can't tell you nothing
On your head or mine, I can feel there's something
I know you, I know you better

It's like you wanna hold the thought of you over me
It's 4AM, you got me calling, you go to sleep
You say you love me then you treat me like nobody
You're hot and cold, but only want you holding me

Holding me closer, holding me down
Head on my shoulders, look at you now
With your feet off the ground
But I wanted fast the real you

What's the point when you can't see it?
You say things that you don't mean, yeah
I can't figure you out, can't figure you out, can't figure you out
No I-I

Broken dreams, I know we shared
I'm feeling like you never care
I can't figure you out, can't figure you out, can't figure you out
No I-I

I don't want to let you go, I've been falling deeper
I don't wanna let you know
No mistakes, I can put you to the West side
All the time I've been thinking 'bout you late night, oh

You say you want it, girl I want it too
Feeling my body, it's your body too
Summer nights and drunk shit on the weekend
Fell in love with you, we can't be friends, yeah

Holding me closer, holding me down
Head on my shoulders, look at you now
With your feet off the ground
But I wanted fast the real you

What's the point when you can't see it?
You say things that you don't mean, yeah
I can't figure you out, can't figure you out, can't figure you out
No I-I

Broken dreams I know we shared
I'm feeling like you never care

I can't figure you out, can't figure you out, can't figure you out
No I-I

Dying inside, I can tell you love it
When you on a high, I can tell you nothing
