

Running On Fumes

Jaymes Young

I remember the day
We started this engine up
I never wanted to let go of your hand
Do you remember the games
You played that kept me up?
I never wanna see you with another man

Remember when you said
Forever now, forever now?
But babe, this engine is slowing down

Our love is running on fumes, yeah
Our love is running on fumes, yeah
Where's your forever now? yeah
Our love is running on fumes, yeah

I can hear an echo
Of what we used to be
A cold chill running through my mind
There's nothing you can do
To numb the fire in me
And we'll be running out of fumes, tonight
I remember when you said forever

Our love is running on fumes, yeah
Our love is running on fumes, yeah
Where's your forever now? yeah
Our love is running on fumes, yeah

And when I touch you
Nothing can come close
And when I love you
Only God knows
And when I hold you
Like there's nobody else around
But this engine is breaking
Down (Forever)

Our love is running on fumes, yeah
Our love is running on fumes, yeah
Where's your forever now? yeah
Our love is running on fumes, yeah
