

# Let's Live Well

Jazzanova

Hold fire  
Go deep, live fast, die young  
Can I Die old

In your arms  
Did you really ever think that you could lose me?  
Lose me lose

Make Amends  
Break bread, no prayers, save you  
New rules

Look alive  
Now we're running and we're picking up some speed  
So can you love me love me

Take your time  
And I'll take mine  
Cos all I want is you

Oh Let's live well  
Let's be true to each other  
Never let your lover dance away  
Oh Let's live well  
Let's be true to each other  
Love me till we find it  
Love me till we're blinded  
True to each other, true to each other now

I won't hold you back  
I'm gonna cast away the dead weight in the black Sea  
Truly truly

Here the rhymes  
They hold the light  
Cos all I want is you

Oh Let's live well  
Let's be true to each other  
Never let your lover dance away  
Oh Let's live well  
Let's be true to each other  
Love me till we find it  
Love me till we're blinded  
True to each other, true to each other now

Hold fire  
Go deep, live fast, die old  
Can I die young

In your arms  
Did you really ever think that you could lose me?  
Never lose me

Oh Let's live well  
Let's be true to each other  
Never let your lover dance away

Oh Let's live well  
Let's be true to each other  
Love me till we find it  
Love me till we're blinded

Oh Let's live well  
Let's be true to each other  
Never let your lover dance away  
Oh Let's live well  
Let's be true to each other  
Love me till we find it  
Love me till we're blinded  
oh true to each other, true to each other now
