

Right There

JC Chasez

Talking to me all night long
When my song comes on
Will ya come out to play to play
When you work your body
Shake it mami don't hold back
Cause I love to watch you play, you play

And when we take it to the last dance of the night
While everybody else is mackin' we'll be straight
There's always somewhere else
There's always something going late
So don't break up the flow
Vibe with me baby

Chorus

Work your body to the left right there
Work your body to the right right there
Work your body to the left right there
Work your body to the right right there
Work your body to the left right there
Work your body to the right right there
Work your body to the left right there
Work your body to the right right there

Right now put your hands on me
I wish we were in private tucked away, tucked away
I can't imagine
Wait till it happens
Rocking nicely locked up at the waist, the waist

And I can feel it as it blast thru the PA
A static energy that bounces you to me
All the surrounding take a backseat to a space
Like moving in slow motion
Touch me babe

Chorus

Clock is tickling
Next verse kicks in
Thinking on what moves you're gonna make, don't wait
Don't be shy show her that you got it
Covered in sweat
So move in without delay, delay

The lights are flickering, the last call's being made
But our attentions haven't broken, or been phased
There's always something else
There's always something going late
So don't break up the flow
Eyes this way babe

Work your body to the left right there
Work your body to the right right there
Work your body to the left right there
Work your body to the right right there
Talking flirty right up in my ear

Just don't stop what you're doing to me
I get hot when you breathe on me
So work your body to the right right there

Work your body to the left right there
Work your body to the right right there
Dance all night to my favorite song
Work your body to the right right there
Talking flirty right up in my ear
Just don't stop what you're doing to me
I get hot when you breathe on me
So work your body to the right right there

Girl until the sun comes out
I invite you to live
The hypnotic movement wears you down
And subconscious starts to take you over
But follow the sound
Be set free to me
Release what all you built up inside
And when you do it's so good
And you can't turn back now
Wanna feel this way for the rest of your life

Work your body to the left right there
Come on over won't you work that thing
Dance all night to my favorite song
Work your body to the right right there
Talking flirty right up in my ear
Just don't stop what you're doing to me
I get hot when you breathe on me
So work your body to the right right there

Tonight
Dance with my tonight mami
Tonight
Dance for me tonight
The way you do it to me
Driving me crazy, baby
