

# Due To Me

Jean Deaux

I wanna drift off a drunk lullaby  
Provide me a sip of your sweet night life  
Can u slide in a bit  
Catch a ride or a lyft  
Got a light politic  
For your bright side eye

Right off a shift think its 4:59  
Just a guy but to me he the suns twilight  
U could glide after slip  
If u tighten the grip  
But its right when u whipped  
That u find your guide

Cry for a bit get them big red eyes  
Find your shine offline any1 said why  
Cause u might break down  
If it creep up  
Let the feels coexist, say bye bye to the shit

The riddle make sound, nobody come round less I allowed it  
Better give it up now, it don't simmer down turn 2 mountains  
Ain't it astounding that's when I found the fountain  
I break me down to stack up  
That's why the walls is back up

He don't even know what to say to me  
Made 10 tolls but he paid the fees  
When kingdom come lil baby  
Still want it baby I  
I jus want love to set us free

And I'm hearin what ya due to me  
Pushin me and pulling me unusually no fooling me  
I wanna see it visually  
You could get it here I ain't no bougie thing  
Bling bling, it don't phase me  
Take it brutally  
Unless u wanna pull up on a wedding ring  
No thing

Let it breathe

Rain do wash hope the levees sing  
23 storms I lost everywhere  
Reborn a better me, no time for settling  
Constantly leveling  
I seen the clouds and the doubts the fears  
If the shit drown me out, I'll return for my reckoning  
Cause I ain't know one any can throwaway  
That's when you brought sun, prototype  
Protege

And I'm hearin what ya due to me  
Pushin me and pulling me unusually no fooling me  
I wanna see it visually  
You could get it here I ain't no bougie thing

Bling bling, it don't phase me  
Take it brutally  
Unless u wanna pull up on a wedding ring  
No thing

They say its no such as a new religion  
My body something like a euphemism  
My spirit tell it its a fluid prison  
Negative peons get no recollection  
Listen to the flutters they be coming from my intuition
