

Bee Alright

Jebroer

In the morning, in the night
In the darkness, in the light
Live forever so we can die
Everything will be alright

Everything will be alright

It's no day but today
I don't really care about what people have to say
It's no day but today
If you got a problem better say it to my face

It's no day but today
If you got a problem better say it to my face

In the morning, in the night
In the darkness, in the light
Live forever so we can die
Everything will be alright

Everything will be alright

It's no day but today
I don't really care about what people have to say
It's no day but today
If you got a problem better say it to my face

It's no day but today
If you got a problem better say it to my face
