

Miles In Between

Jeff Bernat

Counting the days till I see you
Because you're so far away
I swear that the miles in between
Are the reasons why we argue
Staring at your face over FaceTime
But yet it's just not the same
I swear that tears that you've cried
Had already formed an ocean
Over and over can we hit repeat
We fight then apologize
Make up and then be alright

But if you can't relate then how can we be alright
We gotta compromise
Why does it gotta' be so complicated

(You say) I'll meet you in the middle
(It just gets hard) but you gotta' stay patient
(Highs and lows)
Now lady hold tight, I know it's complicated, can you tolerate it
(You say) Meet me in the middle
(It just gets hard) But you gotta' stay patient babe
(Highs and lows)
Now lady hold tight, I know it's complicated, can you tolerate it

How many more days till' I see you
Why are you so far away
Feels like it was yesterday
I could actually hold you
Staring at your face having real time
Ooh those were the easy days
But now all the tears that I cried
Have already formed an ocean
Over and over can we hit repeat
We fight then apologize
Make up and then be alright

But if you can't relate then how can we be alright
We gotta compromise
Why does it gotta' be so complicated

(You say) I'll meet you in the middle
(It just gets hard) but you gotta' stay patient
(Highs and lows)
Now lady hold tight, I know it's complicated, can you tolerate it
(You say) Meet me in the middle
(It just gets hard) But you gotta' stay patient babe
(Highs and lows)
Now lady hold tight, I know it's complicated, can you tolerate it

I want to go back to those days baby
Can we just compromise (just compromise)
