Planes (Experimental Aircraft)

Jefferson Airplane

I love planes, jet aircraft I love planes, jet aircraft

He was just a little boy and he sat there in his school And the little girl in the very next chair she thought he was s o cool And she watched him draw and draw Planes and wings and flying things

Even during tests he'd keep on drawing And his mother didn't want him And his father was always working so he just set his head To the center of the sky and dreamed of

Flying at first like a leaf floating in the air Now like an eagle soaring there Flying great roaring engines now will lift my wings Rockets now and spacecraft to the center of the sky

I'm getting ready for a great leap forward, ready for a leap in the pool Ready to touch the stars again, ready to go back to school Puttin' the pieces together, put on your wings and come with me and Fly fly fly to the center of the sky, let's go flying

I love planes, experimental aircraft I love planes, jet, jet, jet aircraft Breaking through the sound barrier Into, into the light

And the little boy is still like a little boy And he met another Little girl and they made another little boy And the new little guy still loves planes and flying things

And both his mother and father love him and Hold him and hug him whenever he needs it and Soon will send him lovingly to the center of the sky And teach him

Flying and dreaming And visions true flying I love planes jet aircraft I love planes sensual aircraft
