

# Planes

## Jefferson Airplane

I love Planes  
Jet Aircraft  
I love Planes  
Jet Aircraft

He was just a little boy and he sat there in his school  
And the little girl in the very next chair she thought he was so cool  
And she watched him draw and draw  
Planes and wings and flying things  
Even during tests he'd keep on drawing  
And his mother didn't want him and his father was always working so he  
Just set his head to the center of the sky and dreamed of

FLYING at first like a leaf floating in the air  
Now like an eagle soaring there  
FLYING Great roaring engines now will lift my wings  
Rockets now and spacecraft to the center of the sky

I'm getting ready for a great leap forward  
Ready for a leap in the pool  
Ready to touch the stars again  
Ready to go back to school  
Puttin' the pieces together  
Put on your wings and come with me and  
Fly fly fly to the center of the sky let's go  
Flying

I love Planes  
Experimental Aircraft  
I love Planes  
Jet Jet Jet Aircraft  
Breaking through  
The sound barrier  
Into  
Into the Light

And the little boy is still like a little boy and he met another  
little girl and they made another little boy  
And the new little guy still loves planes and flying things  
And both his mother and father love him and  
Hold him and hug him whenever he needs it and  
Soon will send him lovingly to the center of the sky  
and teach him

Flying and Dreaming and Visions  
True Flying  
I love Planes  
Jet Aircraft  
I love Planes  
Sensual Aircraft
