

Little Light

Jelly Roll

Alicia got high for the very first time
Floatin' in the sky, she'll never be the same again
Pills in her hand and laughin' at her plans
Stealin' her away from her family and all her friends

Two days turned to two months
Turned to too long, turned to too much
Heaven knows that I've been there before

I've been down the darkest road
Set fire to all my homes
One thing I learned in life
Save room for the little light
I know you've been so close
To the edge of letting go
Before you say goodbye
Save room for the little light

Little Mike cried when he got that time
Gavel came down and he kissed this world goodbye
Knows and he prays he'll get out someday
But time feels frozen and he keeps losin' faith

Two days turned to two months
Turned to too long, turned to too much
Heaven knows that I've been there before

I've been down the darkest road
Set fire to all my homes
One thing I learned in life
Save room for the little light
I know you've been so close
To the edge of letting go
Before you say goodbye
Save room for the little light

Save room for the little light
