

# Way Down Deep

Jennifer Warnes

Way down, way way down  
Way way down deep  
You've got me way down, way way down  
Way way down deep

You're got me way down, way down deep  
I wander with you in my sleep  
I'm way down, way way down  
Way way down deep

It came to me this morning  
I was walking down the street  
Was like my soul could taste you  
And God, you tasted sweet

Finally I can breathe again  
Finally I can speak  
I've got you in the glory place  
I've got you way down deep

I've got you way down, way way down  
Way way down deep  
You're got me way down, way way down  
Way way down deep

You're got me way down, way way down  
I wander with you in my sleep  
I'm way down, way way down  
Way way down deep

It's a funny feeling  
But I cannot say I mind  
I know that I'm dealing with  
A love that's far from blind

I see every single angle  
I look before I leap  
And how else can I put it  
When you're got me way down deep

You've got me way down, way way down  
Way way down deep  
You've got me way down, way way down  
Way way down deep

You've got me way down, way down deep  
I wander with you in my sleep  
I'm way down, way way down  
Way way down deep

Don't matter what we gave away  
Was nothing we could keep  
Don't matter what we gave away  
You know that talk is cheap

Forgive me if I hate you  
You're a liar and a thief

But I've got you in the glory place  
I got you way down deep

You've got me way down, way way down  
Way way down deep  
You've got me way down, way way down  
Way way down deep

You've got me way down, way down deep  
I wander with you in my sleep  
I'm way down, way way down  
Way way down deep

Don't matter if the road is long  
Don't matter if it's steep  
Don't matter if the moon goes out  
And darkness is complete

Don't matter if we lose our way  
I know we're gonna meet  
I've got you in the glory place  
I've got you way down deep

You've got me way down, way way down  
Way way down deep  
You've got me way down, way way down  
Way way down deep

You've got me way down, way down deep  
I wander with you in my sleep  
I'm way down, way way down  
Way way down deep
