

# Waves

Jeremy Loops

The sun keeps calling  
And I've been chasing early  
So give me the coffee in the morning  
A kiss when she leaves me  
To get my day started  
So I breathe in life [sniff]  
And get to another rhythm and I'm in the flow  
Sitting in the backline, waiting for the perfect one

And the waves came, washed over me  
And the waves came, washed over me  
And the waves came, washed over me

Maybe I've been stallin'  
Baby I just won't curve it  
Just to keep it in your pocket  
Kisses when she needs me  
Loving and a locket

I want to be water  
Skipping rocks in my soul again  
Pebbles on Long Beach, slowly turning into sand

And the waves came, washed over me  
And the waves came, washed over me  
And the waves came, washed over me

And the waves they, wash over me  
Cause the riptide pulls me out into the deep  
It surrounds me, holds me, follows when I breath  
But the air is clear and I am here

And the waves came, washed over me  
And the waves came, washed over me  
And the waves came, washed over me  
And the waves came, washed over me
