

City Of Angels

Jeremy Shada

There's some dreams that never die
Out of reach but close enough to keep you up at night
Time goes by, they drift away
But I'm still here chasing yesterday

For every star
A million fade
So for dream we always make the trade

In the city of angels
The saints keep falling down
Even if I make it no one ever makes it out
Chasing lies every single night made me wanna look for what can't be found
Lord I need a break, a break from this town
I just need a break, a break from this town
God give me a break from this town

All the demons (All the demons)
Need a favor (Need a favor)
Just don't ask for one in return (In return)
And everyone loves you (Everyone loves you)
When they get something from you (Get something from you)
Soon enough they'll light the match and watch you burn (And watch you burn)

For every star
A million fade
So for dream we always make the trade

In the city of angels
The saints keep falling down
Even if I make it no one ever makes it out
Chasing lies every single night made me wanna look for what can't be found
Lord I need a break, a break from this town
I just need a break, a break from this town
God give me a break
A break

Look in the mirror, what do I see?
A broken kid chasing broken dreams
Traded love for apathy
Look in the mirror, what do I see?
A broken kid chasing broken dreams
Right and wrong, of distant memories

In the city of angels
The saints keep falling down
I finally made it
Now all I want is out
Stage lights, sleepless nights, that they don't see on the screen
Come crashing down (Crashing down)
Lord I need a break, a break from this town
I just need a break, a break from this town
God give me a break, a break from this town
I just need a break
God give me a break
A break from this town
