

Dark Heart

Jeremy Shada

Your gravity is bring me down in embers
Our galaxies, collide and crash together
You push and I pull
Supernova in a black hole
Shooting stars burn out, I'm afraid we'll hit the ground

My hearts falling fast for you
Your eyes, brighter than any moon
In a trance, lost in a dance with the stars
Pure light piercing my dark heart

Babe I've fallen in zero gravity
Caught in slow motion every seconds like eternity
Babe I've fallen paralyzed and lost for words
Your lips pull me closer
Caught between, caught between heaven and earth

I can, barely breathe
Baby you're changing my atmosphere
All the space between
Is shrinking more the longer you're here

My hearts falling fast for you
Your eyes, brighter than any moon
In a trance, lost in a dance with the stars
Pure light piercing my dark heart

Babe I've fallen (I've fallen) in zero gravity
Caught in slow motion every seconds like eternity (Eternity)
Babe I've fallen paralyzed and lost for words
Your lips pull me closer
Caught between, caught between

You push and I pull
A supernova in a black hole
Shooting stars burn out, I'm afraid we'll hit the ground

Babe I've fallen in zero gravity
Caught in slow motion every seconds like eternity
Babe I've fallen (I've fallen) paralyzed and lost for words (And lost for words)
Your lips pull me closer
Caught between, caught between heaven and earth

My hearts falling fast for you (You push and I pull)
Your eyes, brighter than any moon
In a trance, lost in a dance with the stars (A supernova in a black hole)
Pure light piercing my dark heart
Babe I've fallen paralyzed and lost for words
Your lips pull me closer
Caught between, caught between heaven and earth
