

The Story Of Our Lives

Jeris Johnson

Let's go

This is the story of our lives
To live forever is to die
And all we know is all we leave behind
So if the world is spinning
It's only just beginning
This is the story of our lives

I don't live by how it's written, I'mma go the way I go
Making gold from what I'm given, greatest story every told
I would never fit the system, I was born to break the mold
And now I know, destiny has told me so

I got an energy bigger than most
After the war I'm making a toast
Here's to the heir he's finally home
Sit in the chair return to my throne
The future is back and I'm at it again
I shred and I riff like a god where you been
I took a few shots right on the chin
Now tell me do you feel the power within?

If the world is spinning
It's only just beginning
If the world is spinning
It's only just beginning
This is the, this is the

This is the story of our lives
To live forever is to die
And all we know is all we leave behind
So if the world is spinning
It's only just beginning
This is the story of our lives

This is the story of our lives
To live forever is to die
And all we know is all we leave behind
So if the world is spinning
It's only just beginning
This is the story of our lives

If the world is spinning
It's only just beginning

This is the story of our lives
To live forever is to die
And all we know is all we leave behind
So if the world is spinning
It's only just beginning
This is the story of our
This is the story of our
This is the story of our lives
