

Deep Thoughts

Jerrold Niemann

Can you imagine being a guy ladybug?

Where will I be ten years from now?

Hell, where will I be ten minutes from now?

If I was a crystal in a cave, would I be a stalagmite, or a stalagmite?

Why would they ever make a baker's dozen beer, when there's thirteen of us? wow

So if it takes the sunlight eight minutes to travel the earth

That means that we actually have eight minutes of light? ask why

Why am I asking so many questions?

You know, with all this controversy with lead, why is there still number two lead pencils out there?

Why did I ever leave college? I miss college

I miss Miss. Carter, I miss Miss Carter

Why am I talking to myself in the microphone, with lots of reverberation?
