

Half Way Gone

Jes

I never knew when I let you in
Where friends stop and love begins
A lifetime away
I didn't know when we said goodbye
That we were done
Please don't deny me now
Don't say
Don't break this

Cause your half way gone
I know the urge is strong
But give me half a chance
So I can bring you back
Half way gone
Half way gone

It's a feeling I can't describe
A side effect that wont subside
But I keep trying to pull through it
I know its rough but I take this ride
And you can pack your bags and drive
Don't say it
Just save it
Don't break this
Just save it

Cause your half way gone
I know the urge is strong
But give me half a chance
We've come so far so fast
Half way gone
Half way gone
