

My Moon

Jess Benko

Stars sparkle at night
But your eyes are my only light
Hold my hand as we cross together
Get to the other side of the river

Kiss me slowly and get closer
Forget the rest of the world
Remember this moment
Cherish it as we know it

My moon
My favorite toon
My pretty little loon
My moon

Light the match for the fire
Sit down and hold me tighter
Watch as everything fades away
You're all that's on my mind today

Stay up here all year
You and me we can disappear
I think I'm finally okay
We'll be happy in our own way

My moon
My favorite toon
My pretty little loon
My moon

My moon
My favorite toon
My pretty little loon
My moon
