

# Electricity

Jess Godwin

We are the spark  
We are the grid  
We got the heart  
We got the switch  
Blackout  
We can't be fixed  
We're crossing our wires

They are the howling hurricane  
Comin' down down down  
Comes the rain  
Blackout  
I feel the pain  
They're crossing our wires

Hold back the water  
Hold back the water  
Hold back and honor the heat  
Hold back the water  
Hold back the water  
We are the electricity

We are the kind  
We are the brave  
We turn our eyes  
Kneel down and pray  
We know we put our children in graves  
We're running from cowards  
Running from cowards

We are the gods  
We are the suns  
We play the losing odds  
And cling to our guns  
Kingdom come is not won  
It's not gonna come  
If we're running from cowards  
We got the power

Hold back the water  
Hold back the water  
Hold back and honor the heat  
Hold back the water  
Hold back the water  
We are the electricity

We're electric  
We're electric  
We're electric  
We are electric  
Electric  
Electric  
Electric  
(Oh we are the electricity)

We're electric  
We're electric

We're electric  
We're electric  
Electric  
Electric  
We're electric  
Electric  
...

We are a billion tiny stars  
Heroes and villains, blank avatars  
We're so much more than we are

Hold back the water  
Hold back the water  
Hold back and honor the heat  
Hold back the water  
Hold back the water  
We are the electricity

Hold back the water  
Hold back the water  
Hold back and honor the heat  
Hold back the water  
Hold back the water  
We are the electricity
