

Disaster

Jess Moskaluke

I'm trying not to pretend that it won't happen again and again like that
Never thought it would end, but you got up in my head and my head like that
You made me happy baby, but love is crazy, so amazing
But it's changing, rearranging
I don't think I can take anymore

Cuz the walls burned up and our love fell down
And it turned into whatever now we're saying never
Feel the fire cuz it's all around and it's burning
For forever and always
We gotta let it go, be on our way
Look for another day, cuz it ain't the same my baby
Watch it all fall to the ground
No happy ever after, just disaster

Didn't want it this way, I only wanted to say
Is I loved you right
Then your love went away, and I needed you to stay
But I can't wait for you to realize
All the things I gave you, made you change you
Your dreams came true
When I met you, now forget you
Don't want anymore

Cuz the walls burned up and our love fell down
And it turned into whatever now were saying never
Feel the fire cuz it's all around and it's burning
For forever and always
We gotta let it go, be on our way

Look for another day, cuz it ain't the same my baby
Watch it all fall too the ground
No happy ever after, just disaster

You shot the bullet, you shot the bullet that killed me
Not feeling my heart beat, and now I was dying
I I've been through it, I I've been through the agony
And now my eyes I'm trying, trying, no more crying,
Lying's just a game,
To stand up straight and I'm all right cuz my loves on his way

Yeah
Burning for forever and always

Cuz the walls burned up and our love fell down
And it turned into whatever and now we're saying never
Feel the fire cuz it's all around and it's burning
For forever and always
We gotta let it go, be on our way
Look for another day, cuz it ain't the same my baby
Watch it all fall too the ground
No happy ever after, just disaster

Cuz the walls burned up when our love fell down
And it turned into whatever now we're saying never
Feel the fire cuz it's all around and it's burning
For forever and always

We gotta let it go, be on our way
Look for another day, cuz it ain't the same my baby
Watch it all fall to the ground
No happy ever after, just disaster
