

No Place Like You

Jess Moskaluke

I've seen a lotta black-top roads
Been living outta hotel rooms
Still got a lotta miles left to go
Every day I'm somewhere new

I ain't slept in my bed in about ten weeks
But all I'm missing is you next to me

There's no place like you, like you
If you're there, I wanna be there too, there too
Could be anywhere if home is where the heart is, right there in your
arms
Is a home sweet home kinda view
No place like you
There's no place like you

Missing you all day, all night
It's kinda getting worse by the [?]
Kinda wanna take a red-eyed flight
To wherever you're at right now

I ain't looked in your eyes in about ten weeks
Homesick, till you're next to me

There's no place like you, like you
If you're there, I wanna be there too, there too
Could be anywhere if home is where the heart is, right there in your
arms
Is a home sweet home kinda view
No place like you
There's no place like you

No place like you, like you
If you're there, I wanna be there too, there too
Could be anywhere, the mountains or the beach
Babe, as long as you're with me
It's a home sweet home kinda view

Baby, there's no place like you, like you
If you're there, I wanna be there too, there too
Could be anywhere if home is where the heart is, right there in your
arms
Is a home sweet home kinda view
No place like you
(There's no place like, there's no place like)
There's no place like you
(There's no place like you)

There's no place like, there's no place like
There's no place like you
