

New Era

JessB

This the new era, watch me, I'm stepping out
Know my worth or know, you muck around, you bet I'll call you out
I've been doing shit for you, now I be doing shit for me
Fill my own cup, fill that mother fucker up
This the new era, yeah my thoughts be feeling clearer
Strategic moves now, I be feeling more clever
Than ever, a change in the weather, you bet its better
I'm coming out like rainbows, ooh grab the glitter
Mouth no filter, now I stand a little bigger
Got my shoulders back, outfit a little slicker
Nothing to do with being cocky or bitter
Rock bottom teaching lessons, that I do deserve better
No matter the distance, no there's never no I'll wishes
But I gotta go, and grow, build some new bridges
There is, many fishes in the sea, many misses
Many millions, and the only riches that I'm chasing is love
The vision that I'm building is that I am enough
The mission right now is I am filling my cup
I'm living for myself and not just for someone
Cause love can be a kinda prison if only one shows up
I missed that memo, stuck on the first level
Had a taste of love, I got a preview or a demo
Heart was never mine, love something like a rental
I want real love, and I will not settle

Lighters up, put your lighters up
This the new era, we are light enough
This the new era, we are quite enough
This the new era, see the fight in us

Lighters up, put your lighters up
This the new era, we are light enough
This the new era, we are quite enough
This the new era, see the fight in us

And believe I will never chase another lover
You can meet me on the bridge or you get swept right under
I've been the rain falling but now I am the thunder
Know my magic and know yours before you share my wonder
I got some traffic at the show like bumper to bumper
The club be popping off some it be jumping its jumping
Feel myself more I've gone from none to a hundred
I am not afraid to skeet skeet, delete your telephone number
Sunflower mood aura be looking like summer
I am power I am me and I am nothing without her
I am lost, I am found, I am winning I am losing
I am strong and I am weak but I am whole and I'm choosing
I work hard and consistent work for my bank roll
My sisters roll with me, prolly posted front row
And we not giving a fuck, we just work angles
Conditioning our souls like some de-tangle
Running my mind, like we be running the times
Like I'm running the scene, you better run me my dimes
We all got something to be, we all got something to see
So let's make a deal you be you I be me

Lighters up, put your lighters up

This the new era, we are light enough
This the new era, we are quite enough
This the new era, see the fight in us

Lighters up, put your lighters up
This the new era, we are light enough
This the new era, we are quite enough
This the new era, see the fight in us

Lighters up, put your lighters up
This the new era, we are light enough
This the new era, we are quite enough
This the new era, see the fight in us

Lighters up, put your lighters up
This the new era, we are light enough
This the new era, we are quite enough
This the new era...

Lighters up, put your lighters up
This the new era, we are light enough
This the new era, we are quite enough
This the new era, see the fight in us
