Outterspace

Jesse & Joy

There's nothing more I'd like to give you
the moon, the sea, the sun, the stars.
Grab a bunch of solar systems
stuff 'em in a cookie jar
come and fly with me to outter-space
skinny dippin' in the Milky Way.
----
i'd like to be your superhero
watching over from above.
and even with a billion people
i could see just where u are.
come and fly with me to outter-space
skinny dippin' in the Milky Way.

I wanna tell you that I love you, I wanna be the one that
takes you to the stars
my superpowers fade around you.
my head is spinning 'round
but we cant touch the ground
come and fly with me to outter-space
skinny dippin' in the Milky Way.

I'm gonna write the largest poem
and print it on the big blue sky
telling everyone I love you
the how, the when, the where, the why.
come and fly with me to outter-space
skinny dippin' in the Milky Way.

I wanna tell you that I love you, I wanna be the one that
takes you to the stars
my superpowers fade around you
my head is spinning 'round
but we cant touch the ground
come and fly with me to outer-space.

And I wanna tell you that I love you
and I wanna be the one who takes you to the stars
my superpowers fade around you.

My head is spinning 'round
but we cant touch the ground
my head is spinning 'round
but we cant touch the ground
come and fly with me to outter-space,
skinny dippin' in the Milky Way.
