

Another You

Jesse Labelle

I could find another pair of ripped up jeans
Another cloud of dust to kick up in this old jeep
I could find another song to turn up when the weekend comes
Another party with the boys some other night we light it up

But girl don't matter how hard I try
I know I'm never gonna find

Another kiss to come along and hit me like this
That makes me wanna close my eyes and wish it would never leave
my lips
Girl I can't replace the little things that only you can do
You're the one thing in this world that I couldn't stand to los
e
Cause id never find another
Never find another you

The way you walk in the room I can't help but lose my breath
Its just what you do
You make me wonder what's coming next

I could spend the rest of my life
Looking but id never find

Another kiss to come along and hit me like this
That makes me wanna close my eyes and wish
It would never leave my lips
Girl I can't replace the little things that only you can do
You're the one thing in this world that I couldn't stand to los
e
Cause id never find another
Never find another you

I know you probably realize you could have any guy you wanted t
o
But baby I could never find

Another kiss to come along and hit me like this
That makes me wanna close my eyes and wish
That it would never leave my lips
Girl I can't replace the little things that only you can do
You're the one thing in this world that I couldn't stand to los
e
Cause id never find another
Never find another you
Never find another you
