

# Call Me Up

Jesse Labelle

Call me up  
In the middle of the night when the clock says everybody's sleeping  
Baby I don't care could be the middle of the week or the weekend  
If you're on top of the world or about to go off the deep end

Call me up when you want that rearview full of nothing but a dust cloud  
When you're in that same old same and you just wanna bust out  
If you wanna shoot the shit or just shoot the lights out, call me up

I'll be there before the song you're listening to is over  
If you need a place to crash girl I got a shoulder  
If you don't wanna drink or if you wanna get drunk  
Call me up, call me up  
Just let your finger hit the number under my name  
You know I love to see my phone light up with your face  
When you need something more or when you've had enough  
Call me up, call me up

Just call me up when you need a smile on the other side of a cup of coffee  
Whatever's weighing in your mind just lay it on me  
If you're alone in a crowd or if you're only lonely, call me up

I'll be there before the song you're listening to is over  
If you need a place to crash girl I got a shoulder  
If you don't wanna drink or if you wanna get drunk  
Call me up, call me up  
Just let your finger hit the number under my name  
You know I love to see my phone light up with your face  
When you need something more or when you've had enough  
Call me up

Or if you wanna find you a good time out til' the sunrise night on the town  
If you got a strapless black dress never been worn yet hanging around  
Take it down and call me up

I'll be there before the song you're listening to is over  
If you need a place to crash girl I got a shoulder  
If you don't wanna drink or if you wanna get drunk  
Call me up, call me up  
Just let your finger hit the number under my name  
You know I love to see my phone light up with your face

When you need something more or when you've had enough  
Call me up, call me up
