

It's Christmas

Jesse Labelle

It seems like it took forever
But it's finally Christmas time
I can't wait to be together
Sitting by the fireside
Life can sure get crazy
Til' it starts to bring us down
But if anything can turn our hearts around
It's Christmas

Strings of lights and reindeer flights and angels on a tree
Songs about a savior born we sing on Christmas Eve
Even on the coldest night good tidings of salvation and forgive
ness
Are still with us
It's Christmas

Silver bells and Santa's elves
And boughs of mistletoe
Remind us of the memories we've kept from long ago
So let's raise a glass to happiness
And ring the new year in
There's no better time to share the love than when
It's Christmas

Strings of lights and reindeer flights and angels on a tree
Songs about a savior born we sing on Christmas Eve
Even on the coldest night good tidings of salvation and forgive
ness
Are still with us
It's Christmas

Silver bells and Santa's elves and boughs of mistletoe
Remind us of the memories we've kept from long ago
Even on the coldest night good tidings of salvation and forgive
ness
Will be with us
It's Christmas
It's Christmas
