

Love that's where I knew you from  
Another lifetime  
Things like this can be hard to explain  
But I knew that the moment you walked in  
Everything started up again  
I don't know who found who but we had catching up to do

Maybe we were king and queen  
The greatest that the world had seen  
Past each other in the street  
However we were meant to meet  
Might be a while until our next first kiss  
Don't you fear I'm gonna find you in a lifetime after this

Love it's such a funny thing  
And love it never looks the same  
But find it and you'll know it every time  
Love it's so much bigger than  
The promises and diamond rings  
Led me straight to you time after time

Maybe we were movie stars  
Cast in both the leading parts  
But you and I just 12 years old  
However our story's told  
Might be a while until our next first kiss  
Don't fear I'm gonna find you in a lifetime after this

Time is only time  
There's too little in a single life  
So I'll keep trying over and over again  
And I'll be here in line  
Cause it's you I know I'm gonna find  
When I get to the end

Love that's where I knew you from  
Another lifetime  
Things like this can be hard to explain  
But I knew that the moment you walked in  
Everything started up again  
I don't know who found who but we had catching up to do

Maybe I ran into you  
Didn't know what to say or do  
It didn't really matter cause  
In that moment we both knew it  
Wouldn't be long till our first kiss  
Don't you fear love I'll still find you in a lifetime after this
