

# POV

Jesse Labelle

Zoom out take a look  
Ain't hard to figure out  
Same man same life  
But its all different now

I was walking the wrong direction  
All I needed was some perspective  
Step back take it in  
And now I'm seeing it

All the days that I spent chasing something temporary  
Searching for ways to hold on to more than I could carry  
You were there all my life all the signs they point to You  
I couldn't see it till I saw it from Your point of view

Looking for strength  
Some kind of pick me up  
To numb the pain  
Too much was never enough

Tried to find it in my reflection  
All I found were my imperfections  
Zoom in its a mess  
Zoom out its obvious

All the days that I spent chasing something temporary  
Searching for ways to hold on to more than I could carry  
You were there all my life all the signs they point to You  
I couldn't see it till I saw it from Your point of view

Every high and every low  
Holding on and letting go  
Everything out of my control  
Its points to You

All the things that I had to lose  
Dreams that did and didn't come true  
All I know is I made it through  
And it point to You  
And that's my point of view

Yeah, that's my point of view

All the days that I spent chasing something temporary  
Searching for ways to hold on to more than I could carry  
You were there all my life all the signs they point to You  
I couldn't see it till I saw it from Your point of view

Yeah, and it all points to You  
And that's my point of view
