

# Ozempic

Jesse Welles

Is your hunger a source of guilt and shame?  
Did they tell you your DNA's to blame?  
Did they sell you an injection  
Just to help stand your reflection?  
Did the doctor recommend this novel way?

Chemical-assisted self-starvation  
Is the biggest fad in all the nation  
Semaglutide tells the brain  
That your blood sugar's okay  
Then your brain tells your stomach  
"Slow down dagummit"  
And the pounds just melt away

Novo Nordisk is profiteering  
Carpet bagging elixir peddling  
Mafia masquerading as the help  
The food is poison that's the source  
If the hay is bad you don't whip the horse  
Tell all these parasitic companies to crawl back down to hell

Whoa

The chemicals from pharmaceutic waste  
They don't degrade they just bioaccumulate  
They leech down into the ecosystem  
Hurt the fishes and amphibians  
Ozempic, baby, you keep being great

If you're getting a hunch  
There ain't no free lunch  
If it sounds to swell like a fairy tale  
If it's too good to be true  
Then making a lab rat out of you

If Eli Lilly and ole Novo want to make this world less hard  
Dump Wegovy on a famine then they'll never know they're starvin  
g

Novo Nordisk is carpet bagging elixir peddling profiteering  
Mafia masquerading as the help  
The food is poison that's the source  
If the hay is bad you don't whip the horse  
Tell all these parasitic companies to crawl back down to hell
