

# Different People

JESSIA

Oh we really did some damage  
I never knew a heart could break like that  
Finally ripping off the bandage  
And this time really feels like it's the end

I don't wanna wonder where you are but  
I don't have control over my heart no  
I don't wanna wonder where you are tonight

Like are you kissing  
Different people  
Trying not to say my name  
To different people  
Tell me did I get replaced  
I don't want to know it  
But are you kissing different people

I guess this is how it happens  
One day we decide to never talk  
Really got into the habit  
Didn't think I'd see this come undone

I don't wanna wonder where you are but  
I don't have control over my heart  
I don't wanna wonder where you are tonight

Like are you kissing  
Different people  
Trying not to say my name  
To different people  
Tell me did I get replaced  
I don't want to know it  
But are you kissing different people

I'm stuck in my head now  
If I called you right now  
Come and kiss me like you never broke my heart  
Running out of reasons  
Keep you out of reach and  
Pretend like we could never fall apart

But are you kissing  
Different people  
Trying not to say my name  
To different people  
Tell me did I get replaced  
I don't want to know it  
But are you kissing different people
