

# got it bad

Jessica Baio

My pulse is loud, can't turn it down  
I feel the tension through the crowd, let's tune 'em out  
I'll be your ocean, let you drown  
Can you do the math? What's one plus one?  
If you want it bad, we could have some fun  
I could show you how, show you how it's done

Don't know what you want, but I got what you need  
Say there's nobody else if it's not me  
But if you want love, can't take it for free  
If you wanna start this up, come get the keys

Show me you got it bad, so bad, so bad  
Tell me I drive you mad, so mad, so mad  
Yeah, look at me like that (Like that), like that (Like that), like that  
Show me you got it bad, so bad, so bad

Know I got, got you on a chokehold  
We could change up all our plans  
Know I look good, don't gotta be told  
But you could tell me with your hands  
I could spell it out if you got confused  
Whisper in my ear what you wanna do  
Know I like a man who can follow through

Don't know what you want, but I got what you need (What you need)  
Say there's nobody else if it's not me (Not me)  
But if you want love, can't take it for free (For free)
