

Separated

Jez Dior

They can't separate, you from my love and
They want me away, but I don't hear nothing

I don't wanna hear about it, I just wanna touch your body
They don't need to understand me, as long as you can always stand me
Let's just keep it quiet for now, ima be a little light right now
Club is on fire right now, preaching to the choir right now
They don't wanna see us win if they can, they don't wanna see you with your man

Your momma don't want me in her house
Your momma don't want me on your mouth
And if you don't listen you'll get kicked out
So let's show them what we're about

They can't separate, you from my love and
They want me away, but I don't hear nothing

I'm never putting down a bottle, so let it hear for a throttle
And they don't need to hear me out, as long as you can hear me now
Whoever perfect picture anyways, as many cases
And places that needed renovation

I guess my baby must been really crazy, look I get it
I must have been a headache for you

And I love it, the love

Your momma don't want me in her house
Your momma don't want me on your mouth
And if you don't listen you'll get kicked out
So let's show them what we're about

They can't separate, you from my love and
They want me away, but I don't hear nothing
