

Psilocybin (Love in Full Effect)

Jhené Aiko

(Psilocybin, Psilocybin)
Ah, ay...

Get it poppin' on this Psilocybin
Getting rid of inhibition
An insane asylum
I can feel it hit the ceiling
When it's in my body
An out of body experience
A spirit party
Get it poppin' on this Psilocybin
Getting rid of inhibition
An insane asylum
I can feel it hit the ceiling
When it's in my body
An outer body experience
A spirit party

Won't let the day get in the way
We're on a plane to inner space
Don't be afraid, give it away
We gotta make a great escape
Won't let the day get in the way
We're on a plane to inner space
Won't be afraid, give it away
We gotta make a great escape

I can do all things
By the sun light, ay
I can do all things
What a wonderful life
We should do mushrooms
By the moonlight, yeah
What a wonderful ride (right)

Right place, right time
Right mind, right now
Right direction
By your side
You and I, do or die
Who am I? (Who am I?)
Your reflection
Right place, right time
Right mind, right now
Right direction
By your side
You and I, do or die
Who am I? (Who am I?)
Your reflection

Got this Psilocybin in my pocket
I am a healing prophet
Seeds of promise in my garden
I need to harvest often
Such a lush experience
So mysterious
In a sweet delirium, yeah

Got this Psilocybin in my pocket
I am a healing prophet
Seeds of promise in my garden
I need to harvest often
Such a lush experience
So mysterious
In a sweet delirium, yeah

Open up your heart and let me in, let me in
I will not let you down
Don't trip, I gotcha
Open up your mind and you'll feel it, the healing
Go slowly, go slower
No need to rush it

Psychedelics, yeah
(I am helping you grow, oh)
Psychedelics, yes
I am
A supreme bright other
Can't you see my color?
I'm the divine mother
Please don't show my
Please don't blow my cover

Take a ride into paradise
Let's go on a journey hidden in the sky
Come and take a ride into paradise
Let's go on a journey hidden in the sky

Open up your heart and let me in, let me in
I will not let you down
Don't trip, I gotcha
Open up your mind and you'll feel it, the healing
Go slowly, go slower
No need to rush it

Love-lovely feel
Love
Now, breathe
Breathe through it
Be still
Breathe through it
Be here
No fear
You are here
Breathe, breathe
Lovely feel
Breathe, love
Breathe, love
Breath through it

Right place, right time
Right mind, right now
Right direction
By your side
You and I, do or die
Who am I? (Who am I?)
Your reflection

Right place, right time
Right mind, right now
Right direction

By your side
You and I, do or die
Who am I? (Who am I?)
Your reflection

[Dr. Chill:]
I'm from Sirius
8 light years away
15 trillion miles
Without the smiles
Let me see you smile
Give me 5,200 feet of happiness
Now let me see you smile
Give me 5,080 feet of happiness
Are you living?
Or are you just surviving?
Are you giving?
Or are you just jiving?
Let me see love
Living on valued energy
I got life, life, life, life
Love is for happiness
I got life
Love in full effect
I'm from the Universe soul
We're all from the Universe soul (we're all from the Universe soul)
We're all from the Universe soul (we're all from the Universe soul)
We're all one
