

## Open Your Heart

Jill Johnson

I saw you in my thoughts and dreams  
long before we met I believed  
the greatest love was there for me  
and when I'd found it was mine to keep  
I would never let it go  
I would hold it so hard but I did not know  
that time would cast a spell  
on us

I remember how we used to talk  
we said we'd never be apart  
what happened to the love we had  
how can something so good feel so bad  
I'd forever talk to you but soon my words would turn into  
into something you don't want to hear

Open your heart  
and let me know you want me here  
show me that you really care  
that our love comes first  
and I'll open my heart  
I'll give you every piece of me  
you know I'll love you through eternity  
and I always will  
I always will

Let me tell you one thing you need to hear  
If I lose my voice if it disappear  
it would mean the world to me but my life would still go on you see  
If I lose you now for real I can't imagine how it would make me feel  
Our love was everything to me

Open your heart  
and let me know you want me here  
show me that you really care  
and that our love comes first  
and I'll open my heart  
I'll give you every breath of me  
you know I'll love you through eternity  
and I always will  
oh remember me,  
like I remember you

Oh, let's go back  
to when our love was new  
'cus I still want you  
I want you closer to me  
It's not lost  
oh baby can't you see
