

How in the World

Jim Cuddy

Just in time the morning came
Stopped my mind from dreaming
And I tried to sweep the night away
Stepped out on ice cold floor
Sun was hazy, sky was grey
I thought of how we used to be
Just two together wasting time
Not needing any more

And I'm losing my way
And I feel wasting all my days
How in the world gonna make my way on through
I'm walking around in a world that's shades of blue
Shades of blue

Dropped you at the airport line
We cried a little, said goodbye
Winter, spring, and summer nights
Not so long for us to wait
I hope you made your plane on time
I know your parts will all go fine
It's not that I can't see you shine
It's changes that I hate

And your face lingers on
When I wake, wonder where you're gone
How in the world gonna make my way on through
I'm walking around in a world that's shades of blue
Shades of blue

And I feel wasting all my days
But I'm true in my way
How in the world gonna make my way on through
I'm walking around in a world that's shades of blue
How in the world gonna make my way on through
How in the world gonna make my way without you
Without you
