

# Somebody

Jim-E Stack

Every time your body pass me by  
I build bridges just to cross your mind  
Yes I try, yes I try, yes I try  
To keep myself together  
Dating boys that I don't really like  
To see if they could touch me like you do  
Every night, every night, every night  
All I want to do is call  
Do you want me to, Do you want me to

When you're not around  
I just waste my time

Trying to find somebody  
Trying to find somebody like you, you, you  
Trying to find somebody  
Trying to find somebody like you

24/7 when we were young  
And I still can taste you on my tongue  
In my bed, in my head, in my heart  
The pictures never faded  
And I guess I should've know from the start  
That castles made of glass can fall apart  
All I want to do is call  
Do you want me to, Do you want me to

When you're not around  
I just waste my time

Trying to find somebody  
Trying to find somebody like you, you, you  
Trying to find somebody  
Trying to find somebody like you, you, you  
Trying to find somebody  
Trying to find somebody like you

If you change your mind  
Everything is right  
I just need somebody  
I just need somebody like you
