

Running Wild

Jin (BTS)

There's a way
There's a way that we can fly again
Remember how we used to love back then
Living like we had no end

Let's stay out all night
Out all night until we see the sun
Remember how we used to long ago
We can miss the last train home

Don't you let our love go cold
When we're standing still
We can light it up once more
I'll take you there

We'll be running wild
Loving 'til the sun is out
Running 'til there's nothing left
'Til our last breath

We'll be running wild
Loving like it's made for us
Running 'til there's nothing left
'Til our last breath
We'll be running wild

Don't forget
Don't forget about the times we shared
All the places that we used to go
Living like we ruled the world

Don't you let our love go cold
When we're standing still
We can light it up once more
I'll take you there

We'll be running wild
Loving 'til the sun is out
Running 'til there's nothing left
'Til our last breath

We'll be running wild
Loving like it's made for us
Running 'til there's nothing left
'Til our last breath

We'll be running wild
We'll be running wild
We'll be running wild
We'll be running wild
We'll be running wild
