It's been twenty years in the game through the tears and the pain
Had to switch gears but I never veered from my lane
When the cheers disappeared and I would hear its a shame
What happened to his career man I been here just the same
See when you flying high you be feeling so blessed
But how you deal with turbulence that's the true test
Some folks be doing too much others are clueless
Me I just focus on doing what I do best
Success is not about reaching the top at all
It's getting up no matter how many times you fall
So when opportunity comes knockin' at my door
I'm quick to open it like I got a ring cam installed
Man it's been a roller coaster
Used to have my favorite rappers on the wall
Now my face is on a poster
Crazy how ya point of view changes when you're older
All I know is that this ride is far from over
