

The Great Satan (Eat the Rich)

JJ Demon

The only way that were getting out of this predicament we're in, right now, is by dismantling the empire of the United States, of re-distributing wealth, of re-distributing power to a global politic. That is the only way.

They call America the Great Satan
I wonder why they got that from
They talk about the same place that
Lets people die if they can't crowdfund
That's some shit the Devil might like the sound of
It's the shadow of a groundhog
Who knew a sign of great wealth would be just like havin' a hospital gown on
Cyanide pill finna chow down on
Hard like the ground in Alaska
Lamborghini doors on my coffin'
It's imposible to live faster
I had a best friend, but I lost him
Opiates put 'em out to pasture
The loneliest look up in his mother's eyes
Dominic should've lived past her
Yeah, bitch I died twice 27 year
Yeah, I joined the 27 club twice
Henny in the cup when it's darkness
That's you some havin' of night
Maybe it's because I gotta pays, I gotta price
Lately I been fuzzy over qualified school
A felon and a father have to give her daughters life
Sceptical in his smiles and I'm pickin' her up from school

We're here to topple the statues
Possibly burn us a flag
See this razor blade tattoo?
What you think about that?
We hear the scuffle in the backroom
Better watch you six
We're here to do what comes natural
Eat the rich

Yeah, this is How To Build A Guillotine For Dummies since the education moneys in the jails
Who given every livin' billionaire the decision to give it all way or take a bow
You barely even notice just a little off the top
A similar solution if you wanna call the cops
Fuck a state employee with no reason not to shoot
One black life's more valuable than a thousand bullets
Yeah, I wanna own a gun, I wanna vote
I'ma travel abroad, go on a boat the government loves
Know what I want, know when I can't
Best I can do is go on a computer, go on a rampage
Then I get put on another list
I could burn some fuckin' bitch
In other words, freedom is only another word in the public myth
Something everybody ought to add to the fucking list and it's true
If you don't give us any other route to pursuit
You don't get to be surprised when you're on the other side of a coup, eww
I'm gonna make 'em pay, yeah, I swear I will, ha
I'm gonna come and get paid, call me class still

Bitch you get head, hitting your shoulder, make your parents sell
Makin' my name to wells, I don't think you are prepared for hell
Yeah, North Philly bend lands
Drexel Hillbilly, West Philly mad man
Heavy metal settle in the skinny waist line
Exit life being to black, enter sandman

We're here to topple the statues
Possibly burn us a flag
See this razor blade tattoo?
What you think about that?
We hear the scuffle in the backroom
Better watch you six
We're here to do what comes natural
Eat the rich

Hiding from the law when you're all have attacks man citizens, yeah
Tylenol-4's at the bottom if you take like ten of 'em, you're scared
How the fuck I still gotta full head of hair?
Not a single gray, fuck the cops, family first
Every single day bringing the child when they me up
Lord, my arms got a box-cutter insignia
We gotta abolish shanks, we gotta abolish
No need to apologize to holocaust apologists
For no reason we colonized the land with put up monuments
Dope needles, dollar signs, the globe stares in astonishment
I hope there'll be a punishment, I really wanna get bloody
I really wanna stand in judgment of anybody takin' money from anybody in the
struggle
Anybody on a budget
Poor people gettin' ten to twenty for some dumb shit
Corporations incorporating the bloodlet

Mark my fucking words this coup will not be bloodless
Mark my fucking words this coup will not be bloodless
Mark my fucking words this coup will not be bloodless
Mark my fucking words this coup will not be bloodless
Mark my fucking words this coup will not be bloodless
Mark my fucking words this coup will not be bloodless
Mark my fucking words
