

## Better Half

JJ Heller

They say love's not an equation  
And I have to agree  
'Cause the sum of us is greater  
Than the parts of you and me  
It won't make sense on paper 'cause it's too good to believe  
Oh, it's too good to believe

I could add it up or multiply it  
Simplify or sub-divide it  
Any way you choose to do the math  
You will always be my  
My better half

I gave away my heart to you  
When I gave you my hand  
And somehow I still ended up more whole than I began  
I count it as a blessing  
I'll never understand  
Yeah, I'll never understand

I could add it up or multiply it  
Simplify or sub-divide it  
Any way you choose to do the math  
You will always be my  
My better half

Better than I ever dreamed  
Better life  
Better me  
Better times infinity

I could add it up or multiply it  
Simplify or sub-divide it  
Any way you choose to do the math  
You will always be my  
My better half  
You will always be my  
My better half  
My better half
