

Takes Me Back

JJ Wilde

Caught between my twenties ain't it funny how I still feel like a kid
And I'm wondering if this is all it is and its as good as it can get
In my moments of not knowing where I'm at, there's a few things that remind
me who I am
They take me back

Roxxane's in July and getting high right after I turned seventeen
Wearing out the strings and saying things I know I didn't really mean
The sound of Springsteen flows right through me, Born To Run
It's a time machine every time he sings she's the one

It takes me back just like that
Takes me back, it takes me back
It takes me back, it takes me back
It takes me back just like that
Takes me back, moving fast
It takes me back, it takes me back

Back to all the times we were alive but we hadn't even lived yet
Makes me recognize all the things I didn't think that I'd be missing
Jeni calls me up, up all night going on about something all the time
Makes me smile and I feel like I'm right there in the room
Talking just like we used to

It takes me back just like that
Takes me back, it takes me back
It takes me back, it takes me back
It takes me back just like that
Right when I need it, I start to feel it just like that
It takes me back, it takes me back

I can still feel it on my skin, know just what it is
Every time I think about it
I can still feel it on my skin, know just what it is
Every time I think

It takes me back, just like that, takes me back
It takes me back
It takes me back, it takes me back
It takes me back just like that
Right when I need it, I start to feel it just like that
It takes me back, it takes me back

I can still feel it on my skin, know just what it is
Every time I think about it
I can still feel it on my skin, know just what it is
Every time I think about it (Takes me back)
I can still feel it on my skin, (Just like that), know just what it is
Every time I think about it (Takes me back)
I can still feel it on my skin, know just what it is
Every time I think about it
