

Another night has passed by my window  
I know this song  
I've been trying to save for you  
Has gone away  
But I don't worry my heart away  
Cause I know, someday you'll mean to stay

Or am I just wishful thinking  
Call me hopeless  
But why am I still singing?

Even in my weakest  
I'll still take a bullet for you  
And if the loud bang scares you  
I'll stay with you  
But if you really believe me  
You don't have to worry  
Cause I will push through  
Yeah I will push through

And when there is nothing left  
Will you stay for me  
And make me believe that  
There's someone out there like you  
Someone out there like you  
Someone out there like you  
Someone out there like you  
And still got this thing right through

Even in my weakest  
I'll still take a bullet for you  
And if the loud bang scares you  
I'll stay with you  
But if you finally believe me  
You don't have to worry  
Cause I will push through  
Yeah I will push through

And when there is nothing left  
Will you stay for me  
And make me believe that  
There's someone out there like you  
Someone out there like you  
Someone out there like you  
Someone out there like you  
And still got this thing right through
