

Night Sky

JMIN

(I been really trippin' always thinking bout my past
I been living fast got my foot up on the gas
Can't slow down no I can't go back)

I been really trippin' always thinking 'bout my past
I been living fast got my foot up on the gas
Can't slow down no I can't go back
But I just need you
I been really trippin' always thinking 'bout my past
I been living fast got my foot up on the gas
Can't slow down no I can't go back
But I just need you

Aye your love I gotta' keep that
It's my drug I really need that
'Cause I been working I'm just trynna' live a good life
And you be always in my head throughout the night time
I pray to god I'm just trynna' get my life right
And if you ever feeling down look at the night sky
Look up
I know you up there I know you watchin'
Re-up I got a new pack so I'ma flip that
Trynna' get some Prada for my momma I been workin'
She said she want Louis and Chanel
Fuck it a Berkin I feel like it's workin'
My life it been turnin' and I really need you in my life

I been really trippin' always thinking 'bout my past
I been living fast got my foot up on the gas
Can't slow down no I can't go back
But I just need you
I been really trippin' always thinking 'bout my past
I been living fast got my foot up on the gas
Can't slow down no I can't go back
But I just need you
