

Heals Me

JMSN

When I feel alone
Stripped down to the bone
When I get restless
And my options are gone
When I feel ready to give up and go back home
There you are
There you are

My blood gets cold
And I get low
And the pressure just rolls on
Through my body and soul
I still hold on to the only thing I know
And I can see
What's been hiding from me

And every time I start to lose my faith in everything

Your love it heals me
Your love it heals me
Your love it heals me
Your love it heals me

And all it takes
Is a little faith

You keep me safe
You take my breath away
You're worth the wait
Every single day
You never let me down
You stick around
You stick around

And no matter the time or place you're always there for me

Your love it heals me
Your love it heals me
Your love it heals me
Your love it heals me

And all it takes
Is a little faith

Your love it heals me

And all it takes
Is a little faith
