

# Secret Garden

JMSN

There's a secret garden  
Growin' from this chemistry  
With nothin' but the birds and bees  
Where we can let the color bleed

And if you let it mix a little longer  
It floods into the blood stream  
And soaks us both in warm wet dreams  
Till we're splittin' at the seams

Then we bust  
Can't come soon enough  
We both worked up quite a buzz  
With nothin' but the two of us

And if we go a little deeper  
It all gets a little sweeter  
With a mouth full of forbidden fruit  
And if you show me one good reason  
To just follow the feelin'  
Then I'll give all that I have to you

In our secret garden  
That both of us have come to know  
Hidden in a pigeon hole  
Where everything just freely flows  
Let it flow  
And anytime the leaves are fallin'  
All our roots they start to show  
But we both don't care we let it go  
And just watch all the pieces float

And they all  
They all glisten in the sun  
Never ending like they just begun  
Forgettin' where we started from

And if we go a little deeper  
It all gets a little sweeter  
With a mouth full of forbidden fruit  
And if you show me one good reason  
To just follow the feelin'  
Then I'll give all that I have to you

In our secret garden  
In our secret garden  
In our secret garden
